ML Strategies has posted its weekly **Health Care Update**. This publication provides timely information on implementation of the Affordable Care Act (ACA), Congressional initiatives affecting the health care industry, and federal and state health regulatory developments.

Among other newsworthy items, this edition of the Health Care Update summarizes reactions to the **news** that hackers breached **Healthcare.gov's** security and uploaded malware to the website earlier this summer, provides details about the **Department of Health and Human Services'** efforts to make the second enrollment period for the ACA's health insurance exchanges run smoothly, and notes that the **Federation of State Medical Boards** finalized its model legislation to allow states to enter interstate medical licensure compacts.
